Laboratory - 609-291-9072

Dear E-WaterTest Client;

Enclosed please find your comprehensive Priority Water Test report.

We have prepared the report with the consumer in mind, taking special care to provide an informative, yet simple to understand format. If you would like a printed copy of the report, please select the print option on your internet browser window.

The USEPA has designated a “Limit” or “Maximum Contaminant Level” for most parameters included in the Priority Water Test. However, there are some parameters, particularly in the VOC category, that have not as yet been assigned “MCL’s”. If a parameter has an “MCL”, it will be shown in the column immediately to the right of that parameter.

If you have any additional questions concerning your report, you can visit the website, or you can e-mail me directly at the e-mail address listed below.

Please remember that the Priority Water Test is intended to be for personal informational purposes only and not intended to be used for legal or regulatory compliance matters. If a primary parameter located in the VOC, PCB or Pesticide section exceeds the USEPA limit, you may wish to retest the source at a local certified laboratory to confirm its presence.

We hope that you have found the Priority Water Test to be helpful in determining the quality of your drinking and bathing water and hope that we can be of service to many of your family and friends.

Thank You again for your trust in using E-WATERTEST.COM.

Date Collected: **9-4-12**
Time Collected: **7:30pm**

Matrix: **Water**
Source: **PS**
Collected by: **Owner**
EWT Sample #: **E-5563-0904-12**

Primary Parameter	MCL(mg/L)	Result(mg/L)
Iron	0.30	<0.03
Manganese	0.05	<0.01
Lead	0.010	<0.001
Mercury	0.002	<0.0002
Sodium	50.0	16.82
Arsenic	0.010	<0.001
pH	6.5-8.5	6.69
Nitrate	10.0	<0.30
Hardness (CaCO3)	250.0	50.00

All testing performed using USEPA testing methods

MCL = Maximum Contaminant Level **>** = greater than **<** = less than
mg/L = **ppm** (parts per million)

Remarks: Parameters highlighted in **bold type** are above the standards established by the **USEPA** for potable water.

Note: Actual **pH** measurement may be slightly lower or higher than result reported due to transit time of sample or the use of a **Reverse Osmosis (RO)** filter unit.

Report Date: **October 10, 2012**

RE: E-5563

Secondary Parameter	MCL(mg/L)	Result(mg/L)
Sulfate	250.0	<1.00
Total Dissolved Solids	500.0	124.40
Color	15.0	<1.00 cu
Odor	3.0	<1.00 ton
Turbidity	---	<1.00
Alkalinity	---	91.00
Fluoride	4.0	0.17
Conductivity	---	202.00
Chromium	0.10	<0.05
Copper	1.30	<0.05
Potassium	---	0.48
Nickel	---	<0.05

MCL = Maximum Contaminant Level > = Greater Than < = Less Than
mg/L = ppm (parts per million) CU = Color Units TON = Threshold Odor Number

Remarks: Parameters highlighted in **bold type** are above the standards established by the USEPA for potable water.

Note: **Report is intended to be used for informational purposes only and should not be used for regulatory and/or legal purposes.**

Hexane		0.500	nd
1,2,3 Trichlorobenzene		0.500	nd
Total Xylenes	1000	0.500	nd

MCL = Maximum Contaminant Level **MDL** = Minimum Detection Level
nd = none detected **ug/L** = **ppb** (parts per billion) ****** = Exceeds USEPA limits

Remarks:

If present, Chloroform, Bromodichloromethane, Dibromochloromethane and Bromoform are all commonly detected compounds found in many **public water systems** and **private wells** that use chlorine-based products for the purpose of disinfection. All four combined are referred to as **Total Trihalomethanes**.
